

Dr. Jason Pozner

Creating Beauty in Boca

While nearly 80 percent of Dr. Jason Pozner's plastic surgery practice is dedicated to corrective cosmetic procedures, the board-certified plastic surgeon, lecturer and author is passionate with our nationally recognized clinical colleagues, Dr. David Goldberg, at Boca's SummaCare Medical Aesthetics Center, a 6,000-square-foot facility of patient care surgery practices. "This practice has become Boca's all-inclusive representative headquarters. Patients make their goals in a beautiful atmosphere where the latest technologies are delivered in a highly skilled team approach," says Dr. Pozner.

Indeed, with Dr. Goldberg's cosmetic dermatology office in Manhattan plus over 10 New Jersey clinics, we assure our patients and Dr. Goldberg, both in the Northeast and throughout Boca, states Dr. Pozner, "It gives them nearly unlimited access to the very best health, skin and body treatments."

SummaCare Medical Aesthetics Center, affectionately called SMAC, is a world-class laser facility, boasting world cutting-edge technology. "Both Dr. Goldberg and I participate in FDA studies, so we're constantly aware of new and better ways to maintain beauty," adds Dr. Pozner. Both he and Dr. Goldberg travel internationally to study the physicians of the latest techniques.

SMAC also counts Drs. Ken Wigman, Christian Hungen and Dean M. Ramirez, as internationally acclaimed plastic surgeons known for his innovative surgical techniques in reconstruction and cosmetic surgery, among its plastic surgeons. Weight reduction expert, Dr. Murray Brown, complements these gifted physicians. Dr. Mitchell Meier offers a complete age-management program, including hormone replacement therapy and nutritional supplementation. Cellular treatment, massage therapy and skin treatments are popular offerings. Dr. Pozner says, "A patient might have hypertension or a heart augmentation and also desire to lose weight. In this case, in addition to plastic surgery, I can refer her for weight-loss and nutritional counseling right here within the practice," says Dr. Pozner.

SummaCare Plastic Surgery and SMAC have generated a loyal patient following with their dedication, springs of innovative procedures and dedicated medical professionals. Positioned at the forefront of innovation, Dr. Pozner remained abreast the new technology for procedures to share in the practice team. "If it's an eye-opening idea, we know all about it, and are probably testing it right here at the practice. It's an exciting time to be in health and beauty medicine!"
